

June 5, 2020

Hello everyone,

While our city begins to open up a bit more, the latest round of testing for staff continues here at our Home. We have a number of employee results in, with one positive case among them. This person will be off of work according to CDC standards.

In our continuing efforts to better serve our Residents, we asked an infection control nurse from the State Health Department to visit our Home, and she came out today. She reviewed our handling of the pandemic situation, toured the Home, commented on what we are doing right and gave us recommendations on things we could do better. We are grateful for all that she shared with us and will be working to put her suggestions into effect.

As we celebrate Trinity Sunday this weekend, we pray that our loving God, Father, Son and Holy Spirit, will be with you each day.

God bless,

Sr. Julie, lsp
