

May 8, 2020

Hello everyone,

As we mark the 75th anniversary of VE Day we recall the witness of so many brave men and women who have defended our country and its interests through the years, and we thank God for those who are working to fight our current battle against the coronavirus.

Today and tomorrow, as part of this fight, we are having all of our employees tested for the virus, except those who have already tested positive. We Sisters will be retested as well. This will give us a snapshot of where our employee population is at the moment, so as to provide the safest care possible for our Residents. We have recently learned of another staff member who has tested positive for the virus; she has already been away from work for some time.

I would also like to share with you that our Resident priest, Fr. Paul Johnson, OP, went home to God yesterday evening. His dry sense of humor and intellectual analysis of the events in the life of our home will be greatly missed. His death came from causes unrelated to the coronavirus.

As always, I can't end without expressing our gratitude for all of the support we are receiving from so many different avenues. We trust in God's providential care, and through you he is not letting us down.

God bless,

Sr. Julie, lsp
